

No Time To Waste

Friday evening March 19
7 - 8:30 pm

Presented by the Wyandanch Earth Rangers

This year

We're going virtual!
Join us on Zoom.

Did you know bottled water can expire? Though water itself doesn't expire, bottled water often has an expiration date. ... This is because plastic can begin to leach into the water over time, contaminating it with chemicals, such as antimony and bisphenol A (BPA). If ingested regularly, these plastic compounds can slowly accumulate in your body, which could harm gut health, immunity, and respiratory function.

Watch a couple videos with us to learn more about plastics, play a game, and take action to help our planet. If you follow through, there will be rewards.

Register in advance for the Zoom meeting:

An Earth Ranger is someone who cares both **about** the earth and **for** the earth. Earth Rangers understand the importance of learning about the earth's life systems and enjoy experiencing the natural world, but they also know that some of the living things on the earth are in trouble and how they can help.
